Lexip's Fantastic Np93 Alpha - My Favorite Gaming Mouse by Jasper

Posted on March, 18 2021 09:17

The only two gaming mice that have ever come close to replacing my simple yet trusty Logitech G403 Hero are Asus' ROG Chakram and Lexip's Pu94. Lexip's latest gaming mouse, the Np93 Alpha, gets everything right. My G403 Hero has been outranked and replaced. Lexip is a relatively new gaming brand that funded its first mouse, the Pu94, via a Kickstarter campaign. The Np93 Alpha is the newer model, and has all the same unique features except for the internal joystick, but this time, the side joystick is finally close enough for me to reach. It's a small hands-friendly mouse, at long last. I've wanted a mouse like this for so long and now there finally is one. I loved everything else about the Pu94, but those were my two dealbreakers. Lexip's Np93 works beautifully.
